A PRODUCT OF NEW ZEALAND

**AITCHISON**

**SEEDMATIC®**

Combining two proven technologies - a European Seed and Fertiliser air system with over 4 decades of proven Aitchison® seeding experience.

Offering 2 models, with either tine or disc opener, Aitchison® can offer large farmers and contractors a cost effective Air Seeder that will handle the toughest of sowing conditions.

The floating chassis design creates great contour following abilities unmatched by any other large drill on the market today. With a sowing width of 4.8m (4132T) or 4.0m (4132D), these Air Seeders can be comfortably towed by a 120HP tractor.

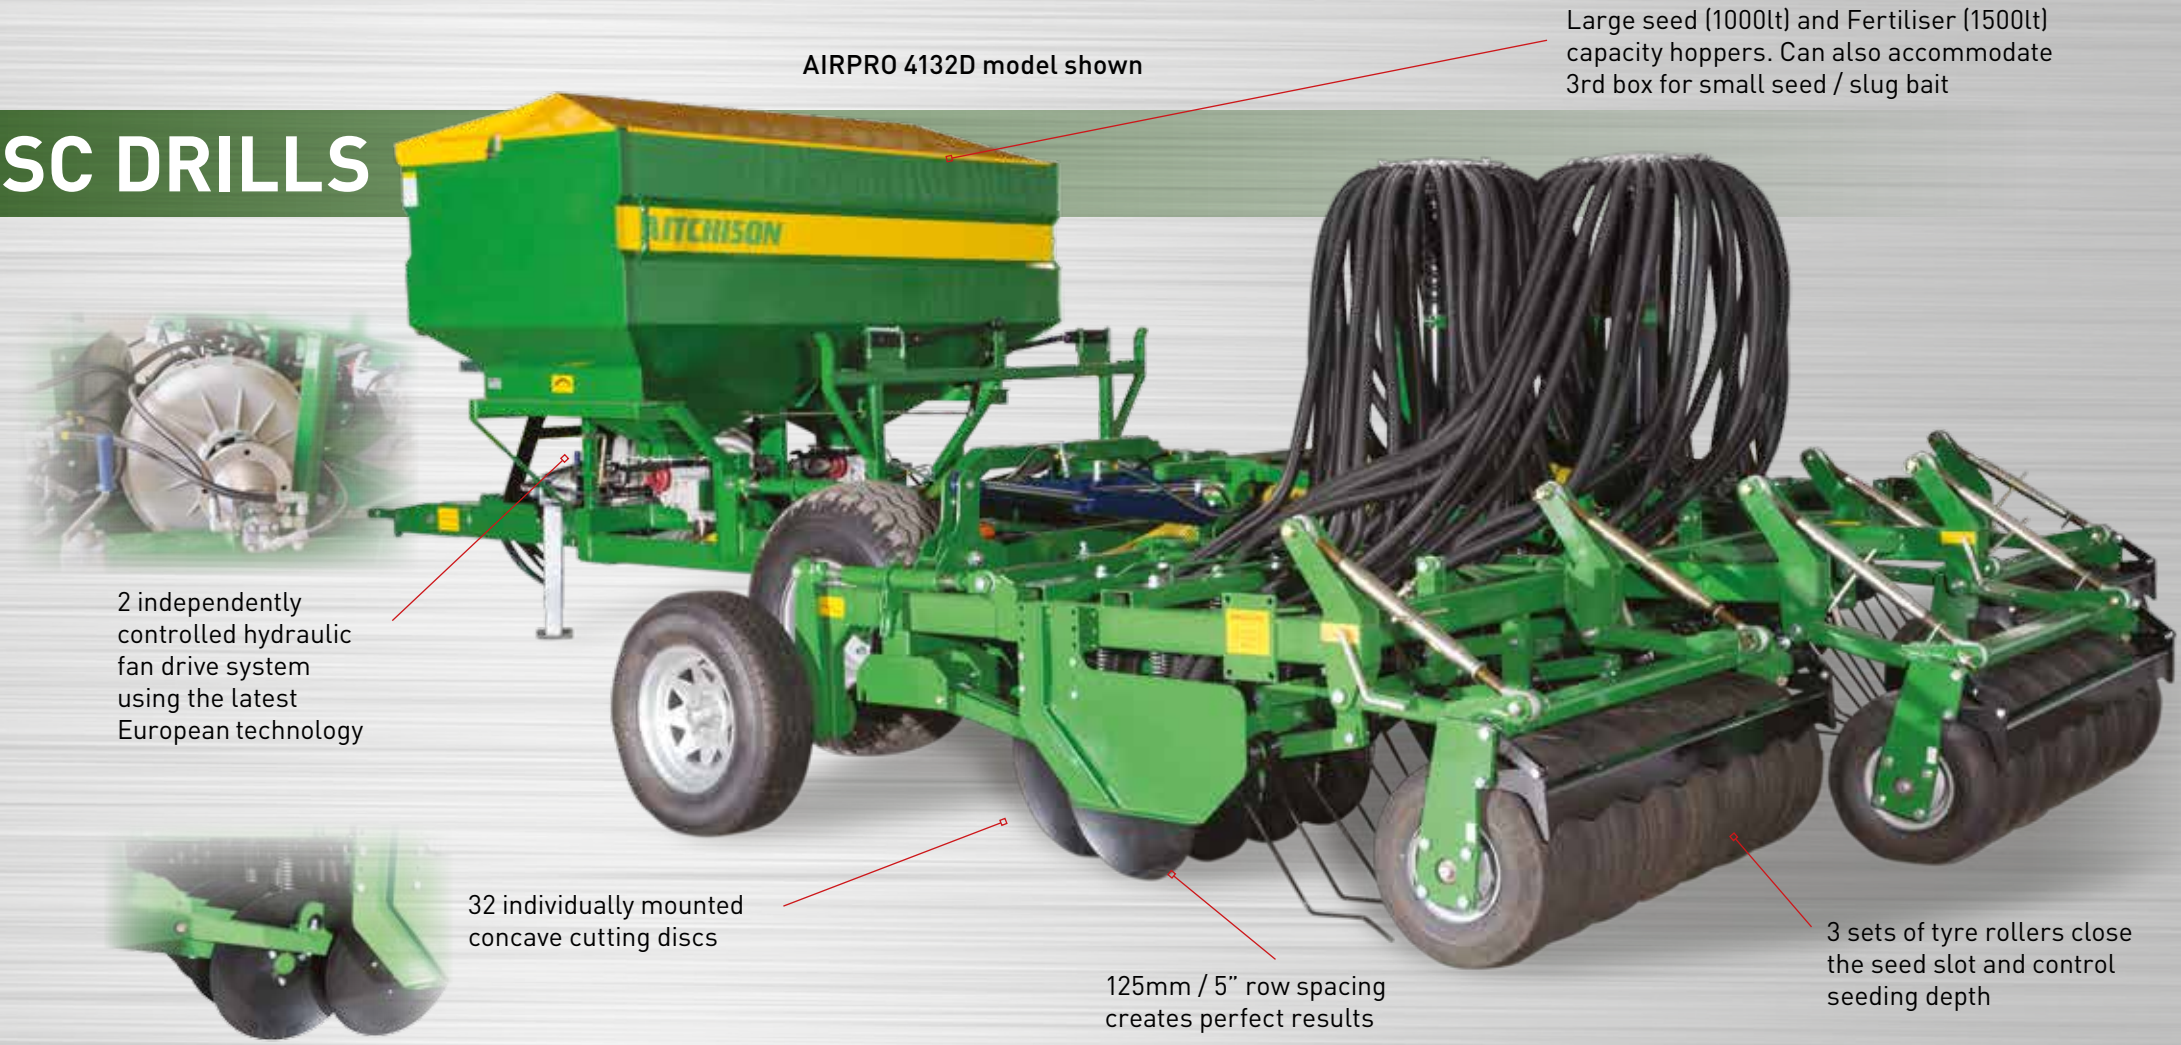

The world renowned Aitchison® inverted T-boot sowing system, with the 32 vibrating 25mm Seedmatic® tines are designed to handle trash with ease. The Disc Opener version has 32 individually spring mounted 18" concave discs with a maximum of 120mm of travel, allowing each disc to follow the contours of the land.

The Aitchison® Airpro range can fold up to a narrow transport width ensuring easy, safe and fast turnaround between jobs. Both models feature transport lighting as standard. The seed hopper holds 1000lt with a fertiliser capacity of 1500lt. Seed and fertiliser rates can be independently set to handle large jobs with ease.

**SEEDMATIC AIRPRO® DISC DRILLS**

| SPECIFICATIONS             | AIRPRO 4132D                  |
|----------------------------|-------------------------------|
| No. of Rows                | 32                            |
| Sowing width               | 4.0m                          |
| Row spacing                | 125mm (5")                    |
| No. concave discs          | 32 (18" heavy duty discs)     |
| Overall width              | 4.55m(sowing) 2.8m(transport) |
