

GO ANYWHERE

2021

AROUND THE GLOBE OR IN YOUR WORLD.

Go conquer any surface on earth with ARGO Xtreme Terrain Vehicles (XTVs). Our powerful XTVs overcome obstacles and exude the confidence to go where others can't. Drive straight through the nastiest swamps. Track over the frozen tundra. Traverse steep terrain. Or haul your hunting crew back where the trophy bucks hide. ARGO technology speaks volumes, and the XTV amphibious ride speaks for itself. While other vehicles just scratch the surface, ARGO XTVs go anywhere — because they can.

Argo

AURORA

950
5x8x8

THE EARTH'S SURFACE IS 71% WATER. PERFECT.

Water is not an obstacle, it's an adventure in ARGO XTVs. In water or ice, our amphibious capability allows you to reach places other vehicles only dream about. ARGO tires are custom engineered to provide propulsion for the vehicle when used amphibiously and provide superior traction to continue any challenging journey. The feeling you'll experience when you plunge this vessel straight into the water will get you hooked.

FRONTIER

FACT: AN ENTRY-LEVEL XTV GOES FARTHER THAN ANY OTHER UTV.

Facts are facts. Other UTVs can't go through swamps or conquer difficult terrain to reach spots within property lines. They have to go around. The Frontier amphibious six-wheeler is our value leader and packs a punch wherever it goes. The bold look and quality features of the Frontier Series reflect its Aurora lineage, resulting in a perfect blend of fun and function. Our ARGO Progressive Steering works in sync with the Classic transmission to produce smooth, confidence-inspiring handling to intrigue traditional UTV riders.

FRONTIER KEY FEATURES

- 600 Series (18HP) or 650 Series (23HP) or 700 Series (23HP EFI) V-Twin Engine
- Classic Transmission with APS
- 24" XT115 Tires
- 8" Steel Offset Rims
- Rear Side Seats
- Front Flat Floor
- Single Low Projector Beam Headlights
- Deluxe Gauge
- HDPE Body Plastics

ARGO Progressive Steering (APS)

Deluxe Gauge with 11 Functions

Flat Front Floor with Accessory Mat

FRONTIER

**EXPAND THAT COZY
COMFORT ZONE OF YOURS.**

An ARGO Frontier 8x8 will bring you to places you haven't been before. Riding on familiar trails are fun, but exploring the unknown is far more exciting. No matter what V-Twin engine you choose, you'll have plenty of get-up-and-go power to push you through mud, sand, rocks, water or thick brush wherever you go. The Frontier 8x8 with ARGO Progressive Steering's smooth handling will inspire you to keep on riding until you reach sun-drenched places far from home.

FRONTIER KEY FEATURES

- 650 Series (23HP) or 700 Series (23HP EFI) V-Twin Engine
- Classic Transmission with APS
- 24" XT115 Tires
- 8" Steel Offset Rims
- Rear Side Seats
- Front Flat Floor
- Single Low Projector Beam Headlights
- Deluxe Gauge
- HDPE Body Plastics

THE EARLY BIRD GETS THE BIRD.

Sunrise is two hours away, but your hunting camp is up and ready to roll. With a hot cup of coffee and powdered donut in hand, this year's possibilities are on everyone's mind. The Frontier 6x6 or 8x8 Scout is your amphibious Sherpa to haul your gear to the wetlands or deer stand buried back in the deep woods — that lucky spot you found with your uncle's ARGO years ago. As you head out this year, remember to relish the time spent with family and friends. Those memories will last a lifetime. And if you get a shot, make it count!

FRONTIER KEY FEATURES

- 700 Series (23HP EFI) V-Twin Engine
- Classic Transmission with APS
- 24" XT115 Tires
- 8" Steel Offset Rims
- Rear Side Seats
- Front Flat Floor
- Single Low Projector Beam Headlights
- Deluxe Gauge
- HDPE Body Plastics

FEARLESS IS ITS NICKNAME.

Fearless. In every sense of the word. The Aurora Series has the strength, nimbleness and versatility that shatters the expectations of what a side-by-side vehicle can accomplish on any surface. The Aurora is the premium platform for ARGO that bolts on exclusive features and advanced technology that ups the ante in high performance. This elite force rolls deep with different models so you can get the right vehicle tailored for how and where you ride. Match your terrain with an Aurora and see what you can discover together.

AURORA KEY FEATURES

- 850 Series (33HP EFI) or 950 Series (40HP EFI) V-Twin Engine
- Admiral Transmission with Triple Differential
- ARGO Progressive Steering (APS)
- 25" XT117 Tires
- 9" AirLock™ Steel or Aluminum Rims
- Rear Bench or Side Seats
- Heat-Reflective Firewall
- Front and Rear Flat Floor with Rubber Mats
- Dual Hi/Low Projector Beam Headlights
- Premium Multi-Functional Gauge
- Premium HDPE Body Plastics
- Available with ROPS

AURORA

AT THE TOP OF THE SIDE-BY-SIDE PYRAMID.

Within the powersports kingdom speed only gets you so far — the strong and aggressive win challenging battles. The Aurora HuntMaster shares this same sentiment wherever it roams in the wilderness. Pure power and mind-blowing traction with 25" tires will get you to those spots on the map that seem virtually impossible. When outdoor enthusiast and machine team up, it's a game changer for the sport, and for those stories back at camp.

AURORA HUNTMASTER KEY FEATURES

- 850 Series (33HP EFI) or 950 Series (40HP EFI) V-Twin Engine
- Admiral Transmission with Triple Differential
- ARGO Progressive Steering (APS)
- 25" XT117 Tires
- 9" Steel Offset AirLock™ Rims
- Rear Side Seats

AURORA

A RESCUE MISSION IS YOUR MISSION.

People in the line of duty have a higher calling. Bravery runs in their veins to make sure tragedy is avoided. When powerful elements like fire, floods or deep snow stand in their way, they partner with another everyday hero — the Aurora Responder XTV. Pure power and performance match its ability to provide rugged stability for the injured on its built-in stretcher mount. The Aurora Responder is ready for any emergency and built to come back safely.

AURORA RESPONDER KEY FEATURES

- 850 Series (33HP EFI) V-Twin Engine
- Admiral Transmission with Triple Differential

AURORA

DOMINATE ANY MUD MATCHUP.

If you are ready to rumble at the thickest outdoor mud arenas, you better be riding the 2021 Aurora Bigfoot MX8. The behemoth 950 engine gives you the power you'll need, while ARGO Progressive Steering (APS) gives you smooth handling in and out of the mud. ARGO-only mud 25" tires with innovative chevron treads will maximize the engine's strength to pull you through the deepest mud pits. Victory, and bragging rights, will be yours with the Aurora Bigfoot MX8.

AURORA BIGFOOT KEY FEATURES

A HUNTING EXPERIENCE YOU WON'T EVEN BELIEVE.

You can't make up the stories that are included with the Conquest Outfitter. And they'll be legit. Camp operators, lodge owners, big-game guides and enthusiasts understand the impact this beast delivers. The dependable 800 V-Twin EFI Liquid Cooled or 950 V-Twin EFI Fan Cooled Engine delivers sure starts in all climate conditions, including high altitudes. The Conquest Outfitter gets you to indescribable places, hauling everything you've got, including your buddy who's always holding things up. "Benny, let's go!"

CONQUEST OUTFITTER KEY FEATURES

- 800 Series (30HP EFI L/C) or 950 Series (40HP EFI F/C) V-Twin Engine
- Admiral High Torque Transmission
- New 25" XT119 Tires
- 9" AirLock™ Steel Rims
- Rear Side Seats
- Front Flat Floor
- Auto Chain Lubrication
- New Dual Hi/Low Projector Beam Headlights
- New Dash with Multi-Functional Gauge
- Brushguard with 4500 lb Winch
- Front Rack
- Premium HDPE Body Plastics

New Dash with Premium 16 Functional Gauge

Heavy-duty Front Rack and 4500 lb Winch

New 25" XT119 Tires on AirLock™ Steel Rims

CONQUEST

THE DIFFERENCE BETWEEN CAN AND CAN'T.

When you have a critical job that needs to get done, you can't call your boss and say, "We can't get there." That's inexcusable. The new Conquest Utility XTVs give you the can-do confidence as soon as you fire up the new 800 V-Twin EFI Liquid Cooled or 950 V-Twin EFI Fan Cooled Engine. Pack in your heavy-duty equipment, because the multipurpose Admiral transmission provides an ideal combination of smooth steering and constant all-wheel traction. Plus with our new 25" XT119 tires and 9" AirLock™ steel rims, unexpected wet and muddy obstacles are the fun part of your job.

CONQUEST PRO KEY FEATURES

- 800 Series (30HP EFI L/C) or 950 Series (40HP EFI F/C) V-Twin Engine
- Admiral Transmission
- New 25" XT119 Tires
- 9" AirLock™ Steel Rims
- Auto Chain Lubrication
- Front Flat Floor
- New Dual Hi/Low Projector Beam Headlights
- New Dash with Multi-Functional Gauge
- Oil-Filled Axles
- Commercial Brushguard with 4,500 lb Winch
- Premium HDPE Body Plastics
- 50 AMP Max Output Alternator

4,500 lb Winch

Roll-Over Protection Structure (ROPS) with Accessory Clear Top and Windshield

A 50-YEAR HEAD START.

What makes an ARGO an ARGO? The world's enduring amphibious Xtreme Terrain Vehicle (XTV) gives you a rare combination of reliable horsepower, advanced technology and high-quality comfort. You can't find anything on Earth that equally compares with an ARGO. Nobody else builds this type of extreme vehicle, because we have over a 50-year head start of proprietary technology that pushes the boundaries to go where others can't.

BIG AND SMALL BLOCK ENGINES

High-performance 4-cycle, twin cylinder, OHV, low-vibration engines with a quiet muffler delivers clean, dependable power for your ARGO.

- 600 Series 18HP V-Twin Fan Cooled
- 650 Series 23HP V-Twin Fan Cooled
- 700 Series 23HP V-Twin EFI Fan Cooled
- 800 Series 30HP V-Twin EFI Liquid Cooled
- 850 Series 33HP V-Twin EFI Fan Cooled
- 950 Series 40HP V-Twin EFI Fan Cooled

800 SERIES ENGINE

Specifically designed for commercial application. This liquid cooled engine provides the perfect balance of horsepower and torque for the Conquest Series.

600, 650 AND 700 SERIES ENGINES

The Small Block V-Twin engines are design-engineered to handle the most demanding terrain. Energetic and quick-starting, these powerhouse engines feature a number of advanced technologies and integrated components, while also being lighter and compact.

850 AND 950 SERIES ENGINES

Legendary. Respected. Proven. These dependable 4-stroke Big Block™ V-Twin engines are built to never let you down. Our highest horsepower series, these engines also deliver the highest torque ever available in an ARGO XTV.

CONQUEST SERIES

ADMIRAL

The Admiral transmission uses some very complex gearing, including dual differentials on the output shafts. So when steering, the braking force is not applied to the output shafts but to a steering differential, which translates to a vastly different driving experience.

While you steer in high gear, the output shafts rotate at a 3:1 ratio, yielding smoother, gentler steering events. While there is no ability for zero turn in high range, select low range and it operates similarly to a traditional skid steer vehicle offering a zero-radius turn.

AURORA SERIES

ADMIRAL with APS

The Admiral with ARGO Progressive Steering (APS) is an innovation in the area of braking force application to the transmission steering differential. By adding a spring element between the handlebars and the brake system we have achieved a progressive dual-rate steering system.

This development combined with the Admiral transmission is a technological milestone giving the ultimate driver experience. Steering events are now effortless and confidence-inspiring, offering the smoothest turning available in an ARGO XTV vehicle. An ARGO is as fun and comfortable to drive as any UTV.

FRONTIER SERIES

CLASSIC with APS

The Classic transmission is our least complex design and operates like a mechanical skid steer, which gives it incredible maneuverability. In order to provide vehicle steering, braking force is applied directly to the output of the appropriate side of the transmission based on the operator steering input. In both high and low range, the Classic transmission provides zero-radius turns to get you in and around extreme terrain.

ARGO Progressive Steering (APS) with the Classic transmission achieves a smooth and comfortable drive experience to all XTVs in the Frontier Series.

GEARED BY
ODG

ARGO engineers took advantage of the research and development available from parent company Ontario Drive & Gear and came up with a revolutionary transmission for the ARGO XTV. At the heart of every ARGO XTV is a proprietary mechanical transmission that transfers engine power to the wheels on each side of the machine. The latest generation of transmissions are available in Classic or Admiral with your choice of High Torque (HT) or Standard Torque (ST) gear ratios.

High Torque (HT) is the ideal option when the majority of ARGO use requires a real workhorse. It's the right choice for extreme terrain, frequently moving heavy loads, high track use, prolonged operation at high altitude, or continuous slow-speed operation. The HT transmission is capable of reaching speeds of up to 19 mph (30km/h).

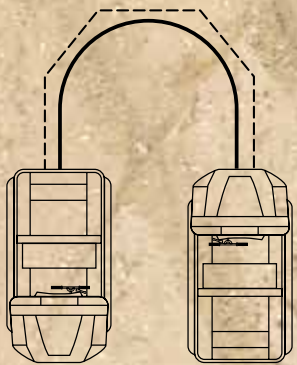

Standard Torque (ST) is the ideal option to provide a balance between speed and torque. Suitable for all types of terrain, frequently moving moderate loads, moderate track use, or occasional high-altitude use. The ST transmission is capable of reaching speeds of up to 24 mph (39km/h).

ARGO PROGRESSIVE STEERING (APS)

APS is an innovation in the area of braking force application to the transmission steering differential.

The brakes are an integral part of steering an ARGO. To remove the traditional skid steering jerkiness, we added a spring element between the handlebars and the brake system to achieve a progressive dual-rate steering system. The result is ARGO Progressive Steering (APS).

APS combined with the Admiral and Classic transmissions is a technological milestone for ARGO — delivering the ultimate driver experience. Steering is effortless, and APS provides confidence-inspiring handling for all riders. This offers improved controllability and the smoothest turning available in an ARGO XTV. It's in a class of its own.

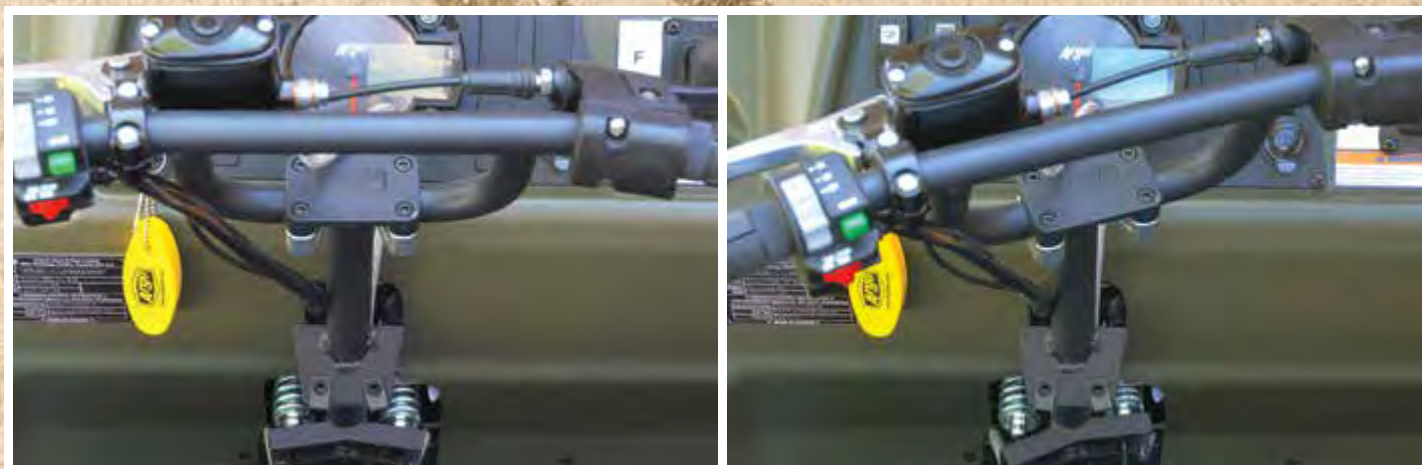

— ARGO
PROGRESSIVE STEERING

- - - TRADITIONAL
SKID STEERING

SILKY-SMOOTH CORNERING AND SKID-STEERING CAPABILITY FOR TIGHT SPOTS.

APS makes XTV as fun and comfortable to drive as any UTV.

By adding a spring element between the handlebars and the brake system we achieved a progressive dual-rate steering system.

Steering is now effortless with an increase of 4x wider range of steering motion, offering the smoothest turning available in an ARGO XTV.

ARGO

TIRES. A RUBBER SUSPENSION SYSTEM.

Newcomers can't believe there isn't a traditional suspension system on our XTVs. Riding an ARGO is smooth and comfortable due to six or eight one-of-a-kind tires and rims. These tires can absorb all the shock of extreme terrains with ease.

AIRLOCK™ RIMS

Our signature aluminum and steel AirLock™ rims are ground warriors that allow operators to adjust tire pressure to the terrain. The AirLock™ feature keeps the tire firmly fixed to the rim in rugged terrain while providing a 30% smoother ride.

LOW-PRESSURE TIRES

ARGO tires are custom engineered to provide propulsion for the vehicle when used amphibiously or to provide superior traction when off-roading in challenging terrain.

RUBBER TRACKS

ARGO heavy-duty rubber tracks provide optimum floatation over snow or swamp with minimal ground pressure. Exceptional traction, lightweight and low-rolling resistance. Easily installs around the tires.

AMPHIBIOUS BODY

The one-piece lower body is the signature ARGO design feature. Its smooth, durable underbody floats over potential snags, stumps and outcrops as well as swamps and water.

REDUCED UNDERHOOD TEMPERATURE

To ensure comfort for the operator and passengers, heat-reflective and absorptive material is integrated into the firewall. A composite exhaust shroud goes one step further and effectively redirects heat while producing a subtle note, from the exhaust.

ARGO

CUSTOMIZE YOUR ARGO FOR WHERE AND HOW YOU RIDE.

Tracks – From extreme duty to general purpose, ARGO heavy-duty rubber and medium-duty plastic tracks are designed to give your ARGO more traction for the most challenging terrain. Durable construction ensures a smooth ride.

Trailers – Gear up an ARGO amphibious trailer with all of your power tools, equipment and outdoor gear. You'll have plenty of room to haul your precious cargo no matter the destination or terrain. Available in four- or eight-wheel models.

Tops – Make sure you keep yourself covered from sun, rain or snow with our hardtops or convertible tops. These tops provide additional safety and coverage for your cargo from whatever Mother Nature throws at you.

Outboard Motor Mount – Add a little more speed on the water by attaching an outboard motor to your ARGO. A genuine ARGO high-quality mounting bracket makes outboard installation quick and easy.

CONVERTIBLE TOP

TRAILER

OUTBOARD MOTOR MOUNT

RUBBER TRACK

Visit ARGOxtv.com to view our full lineup of genuine accessories for every ARGO.

Windshield – Scratch-resistant acrylic means your windshield can take a beating out in the wild. Fold-over hinge for storage and a mounting location for optional windshield wiper accessory make installation quick and easy.

ROPS – For unpredictable and extreme terrain, add even more protection for the ARGO Aurora and Conquest models. Roll-Over Protective Structure (ROPS) gives you full vehicle rollover protection.

Steel Rack – Organize all of your hunting and outdoor gear with our steel rack. Gain additional stowage for packs and equipment for long hunting trips or weekend excursions.

Blade – Maximize the utilization of your ARGO for snow or dirt. This high-quality 80" wide steel blade features multi-angle positions. Requires the power winch for raise-and-lower operation.

LOAD CAPACITY - LAND	841/848 LBS
TOWING CAPACITY	2,000 LBS

KNOW NO BOUNDARIES.

Know No Boundaries is a promise we've made to ourselves and to you. Three simple words the ARGO team lives by every day to challenge conventional thinking. To do things differently. And to go where others can't. All to provide you the world's best amphibious XTVs and off-road ATVs.

We overcome obstacles every day that unexpectedly appear to test this promise. These obstacles have never been more daunting than in 2020. We believe these unimaginable obstacles made us reimagine an even better direction. A direction that's bold. A direction that's bright for all of us. A direction we are committed to as we drive forward together as one team.

No matter what the future brings, our team promises to *Know No Boundaries* more than ever.

Go Anywhere - Team ARGO

Some vehicle applications shown are for demonstration purposes, originating from third parties and not available from ARGO. In all cases vehicle load limits have been considered. Always remain seated while in the ARGO. ATVs and XTVs can be hazardous to operate. Improper use can cause severe injury or death. Riders must wear an approved helmet, eye protection, protective clothing and when operating in water always wear a personal floatation device. Use handholds and stay completely inside the vehicle. Each rider must read and understand the operator's manual before riding. Follow all instructions and warnings. Avoid abrupt maneuvers, paved surfaces, hard acceleration when turning, and side hilling; slow down before entering a turn. Never engage in stunt driving. Avoid excessive speeds and be particularly careful on difficult terrain. Never carry a passenger on a single-rider ATV. ATVs are recommended only for users over 16 years old. Never operate on public roads. ATVs and XTVs are designated for off-highway vehicle access only — collisions with cars and trucks can occur. Never drive or ride under the influence of alcohol or drugs. Do not shoot from or lean firearms or bows against the ATV or XTV. ARGO recommends that all riders take an ATV training course. When equipped with tracks, Conquest Series models are not fully amphibious, however water crossing is possible with a fording depth of 26" (660 mm). For safety or training information in the U.S., call the ATV Safety Institute at (800) 887-2887. In Canada, please contact the Canada Safety Council at (613) 739-1535 or see your dealer. Along with concerned conservationists everywhere, ARGO urges you to respect public and private lands. Ride only on designated areas or trails. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when riding. All materials and specifications are subject to change without notice. All specifications, claims and information contained within are based on current knowledge and readily available as printed material.
